УТВЕРЖДЕНО
приказом ООО «МАКС-Жизнь»
от «14» февраля 2018 г.
№ 09-ОД(ЖЗН)

Базовые тарифные ставки по Правилам страхования жизни

1. Общие положения

В настоящем документе приведены базовые тарифные ставки по программам страхования жизни, рассчитанные в соответствии с Методикой расчета страховых тарифов по страхованию жизни, утвержденной приказом ООО «МАКС-Жизнь» от 14.02.2018 г. № 09–ОД (ЖЗН), в соответствии с Правилами страхования жизни ООО «МАКС-Жизнь».

Фактические тарифные ставки могут отличаться от базовых. Страховщик вправе произвести расчет тарифов с учетом андеррайтинговых повышающих и понижающих коэффициентов. Данные коэффициенты назначаются страховщиком, исходя из обстоятельств, имеющих существенное значение для определения степени страхового риска. Критерий для применения андеррайтинговых коэффициентов основывается на следующих факторах:

- Род деятельности;
- Возраст и пол;
- Состояние здоровья;
- Ожидания страховщика относительно состояние здоровья потенциальных застрахованных;
- Ожидания страховщика относительно степени риска, соответствующего группе потенциальных застрахованных;
- Ожидания страховщика относительно уровня расторжения договоров страхования;
- Территория проживания;
- Форма оплаты страховой премии;
- Размер франшизы;
- Продукт;
- Другие факторы.

Андеррайтинговые повышающие и понижающие коэффициенты назначаются для конкретного потенциального клиента или конкретной группы клиентов. Размер повышающего коэффициента может составлять от 1.0 до 50.0, а понижающего от 0.01 до 0.99.

Размер тарифных ставок для конкретного застрахованного, продукта или партнера может отличаться от размера базовых тарифных ставок за счет отличия нагрузки, установленной по данному конкретному застрахованному, продукту или партнеру, от базового значения нагрузки. Нагрузка призвана учесть среди прочих параметров размер агентского вознаграждения и расходы на ведение дел, которые могут определяться в индивидуальном порядке.

Базовые тарифные ставки по Правилам страхования жизни приведены в таблицах 1-43.

Брутто-тариф по программе "Смешанное страхование жизни" для мужчин, %
